

Digital Open Innovation Campus

DOIC is a global ecosystem building project that aims to create open innovation in industry, academia and government through the Expo 2025 OSAKA, KANSAI, JAPAN

This is not a project targeting only the Expo, but we will continue and expand this ecosystem even after the Expo, contributing to the solution of social issues around the world.

For more information
(DOIC Overview Full version)

How to Participate in DOIC (metaverse) Initiatives

Exhibition

Academia

University,
Research Institution

Government

Embassy,
Government Offices

**Exhibit free of charge
in principle**

Exhibition

Business

General Company

Exhibit with a fee

Co-operation

Participate as a sponsor (sponsored program)

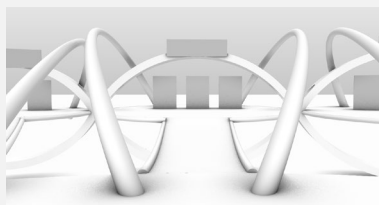

Activities

Theme Week and Symposiums

Theme weeks are set up to address important social issues such as decarbonization and poverty in developing countries.

Participants will collaborate with local communities and stakeholders to discuss how to solve the issues before the symposium, and **present proposals for solving the issues** at the symposium.

DOIC Metaverse EXPO

We connect the main Expo site and satellite sites in real time.

A space will be set up in the Metaverse to **exhibit "contents" from research institutes and companies**. The exhibits will be categorized into four themes, which will be linked to the theme week.

Meet-up events

- **Meetups at Metaverse Space** (about once a month)
- **Social events and commemorative ceremonies** (before the Expo, after the Expo, one year after the Expo, and periodically thereafter)
- **Premium events inviting overseas VIPs** (3 times in total: before, during, and after the Expo)

By joining DOIC, you will have the opportunity to "showcase technology to the world" at the EXPO and establish a "foundation for innovation" by connecting with academia and companies from Japan and abroad participating in DOIC.

Showcasing technology to the world
~Contributing to solving social issues~

- World’s biggest “international trade show”
- The Metaverse exhibition venue/symposiums (online)
 - Companies around the world gain access to research institutes without visiting Japan

Networking with academia
from Japan and abroad

- Strengthening “relationships with participating universities and research institutes from Japan and abroad” (Networking with academia with next generation technologies such as VR/AR/Blockchain)
 - Meeting new research partners
- Collaboration projects with researchers from different universities and global companies and startups.
 - Accelerating research/establishing support systems

EXPO 2025 ▶ Thema-Week

We will participate in the Theme-Week (Track3) held during the Expo. We plan to have sessions with world leaders on the future of the Earth and biodiversity.

Theme	The future of the Earth and biodiversity
Contents	Global Symposium,Talk session
Date	September 20, 2025
Venue	Studio in the Yumeshima venue（Capacity of 100） The event will be held in a hybrid format.
Time	4 hours
Speakers	Leading universities, companies (including start-ups), and experts from around the world

*Please note that there is a screening process for participation.

You can join at any time!
